#### **POVZETEK**

Zadnjih 10 let potekajo na Finskem številne aktivnosti in iniciative na področju rudarstva. Rudarstvo ima na Finskem dolgo tradicijo. Prva odkritja železove rude segajo v leto 1560. Nadalje je danes znanih preko tisoč rudnikov v katerih se je pridobivalo minerale kovin in ostalih industrijskih mineralov. Finska rudarska industrija je danes dobro razvita industrijska panoga, ki pridobiva različne mineralne surovine za kovinsko, kemijsko, papirno in ostalo industrijo. Vsekakor pa je iz preteklosti z rudarstvom povezanih nekaj velikih ekoloških problemov.

**Ključne besede:** rudarska industrija, kovinske rude, Finska.

#### **ABSTRACT**

In latest 10 years in Finland there has been strong initiatives and activities in mining. Mining activity has long traditions. First iron mines were founded already in 1560. After that in Finland there has been quarried metal ores and industrial ores over thousand mines. Mining industry today is strongly developing industrial field which produces raw material to metal, chemical, paper industry and to many other industries and other production activities. However same time there has been strong environment problems failures.

**Key words:** mining industry, metal ore, Finland.
