POVZETEK

V letu 2014 je bil zaključen več let trajajoč evropski projekt MINHER, v sklopu katerega so partnerji analizirali in predstavili primere revitalizacije rudarske dediščine v Labinu in Raši – Hrvaška, Velenju in Idriji - Slovenija, Banovići – Bosna in Hercegovina, Rybniku - Poljska in Carbonia – Italija. Osnovna ugotovitev partnerjev je, da je rudarska dediščina lahko pomemben generator gospodarskega in turističnega razvoja področij, kjer se oziroma so se nekoč rudniki nahajali. V prispevku želimo prikazati nekaj primerov uspešne in tudi manj uspešne revitalizacije rudarske dediščine ter analizirati vzroke za ne dovolj izkoriščene priložnosti na tem področju. Ker se bo predvidoma projekt MINHER v naslednjih letih nadaljeval, želimo za sodelovanje vzpodbuditi tudi potencialne nove partnerje.

Ključne besede: MIN-HER - rudarska dediščina, turistična valorizacija, eksploatacija, rudarska dediščina.

ABSTRACT

In year 2014 project MINHER has ended. Project MIHER was successfully completed in years 2013 – 2014 within European cofinancing programme Europe for Citizens. In scope of project MINHER partners has analysed and present cases of revitalization of mining heritage in Labin and Raša - Croatia, Velenje and Idrija – Slovenia, Banovići – Bosnia and Hercegovina, Rybnik – Poland and Carbonia – Italy. Basic findings and conclusions of partners were that mining heritage can be of significant importance for future economic and tourism development of entire regions whose original development was linked to mining industry. Our aim is to present some good examples of revitalization and reasons for not fully exploited opportunities in this field. Our intent is to carry on with project MINHER idea also in future, so we would like to encourage some of new potential partners to join us.

Key words: MIN-HER - mining heritage, tourist valorization, exploitation, mining heritage.
